

Product Overview

Ferrovac GmbH :: Swiss Precision UHV Technology

Our main area is the design and production of components and systems for ultra high vacuum technology as well as the development of scientific instruments for surface science and nanotechnology.

Our valued customers benefit not only from standard-setting Swiss precision in manufacturing and engineering, but also from our accommodating, high quality services in support, repairs and consulting.

Ferrovac's experts have profound knowledge of ultra high vacuum technology, experimental physics and scanning probe microscopy and our engineers work with the most advanced 3D-CAD technology.

Customization is our daily business: **You name it, we build it...**

Wobblesticks & Accessories

Single and Dual Shaft Magnetically Driven Wobblestick Manipulators for UHV Systems.

Motion Feedthroughs & Accessories

Miniature Linear-Rotary and Rotary Feedthroughs

Sample Transporters & Accessories

Transfer Rods, Single and Dual Shaft

Motorization Options

Motorization for Linear/Rotary Feedthroughs and Sample Transporters

UHV Suitcases & Accessories

Compact UHV Suitcases (Portable Load Locks)

XYZ-Manipulators

Bellows Sealed Translators
