Dry Battery Cells (Pouch; Metal Can)

PMI is pleased to offer dry cells (without electrolyte) for testing of components and chemistries. We'll need to know your required electrode makeup (e.g. LCO/graphite cathode), size, capacity, and voltage. Please keep in mind that available sizes and configurations will depend on our supplier's manufacturing set-up at the time. But we are able to do small custom runs, which may require an extra tooling charge. Typical minimum order quantities are 500 and 1000 cells. Prices vary with size and materials.

Application: Advanced energy

Product type: Consumables

Production scale: Lab

Search tags: dry cells, dry pouch cells
