

COSMETIC-GRADE PERLITE

100% NATURAL REPLACEMENT FOR MICROBEADS

- 100% natural, non-GMO, mineral-based formula
- Gentle exfoliation properties
- Environmentally safe substitute for polybeads
- Increases scrub performance

Looking for a Natural Alternative to Plastic Microbeads?

Look no further than our 100% natural perlite. Similar to microbeads, natural perlite can be formulated in various types of cleansers to provide exfoliation properties for environmentally conscious formulators, chemists, and companies.

Environmentally Safe Solution for Scrubs, Exfoliates, and Shampoos.

1. **Physical exfoliants:** physically scrub off dead skin
2. **Enzyme exfoliants:** help dissolve the dead skin on the surface
3. **Chemical exfoliants:** use acids like BHA and AHA to remove dead skin at a deeper level
4. **Cream exfoliants:** mixture of physical and natural acids to exfoliate
